In accordance with its Funding Guidelines dated January 1, 2022 (as amended), the FWF has issued the following Application Guidelines for Principal Investigator Projects (previously Stand-Alone Projects) effective as of July 1, 2023, version 3.

Please note: Key terms used in these Application Guidelines are explained in the document Definition of Terms.
1 General Information

1.1 Program objective

The aim is to fund clearly defined basic research proposals (hereinafter referred to as “projects”) of high academic quality at an international level. Basic research refers to research that is knowledge-oriented and whose value is primarily defined by its significance for the advancement of science and scholarship. One individual researcher (hereinafter referred to as applicant or principal investigator) is responsible for managing the Principal Investigator Project at an Austrian research institution. The principal investigator can collaborate with associated research partners, national, and/or international collaborators as part of the project.

1.2 Submission

There are no submission deadlines for this program; applications can be submitted at any time. All proposals must be submitted online using the elane digital application portal. Project funding is administered through the research institutions (PROFI); this means the application must be approved for submission by both the applicant and the respective research institution (= lead research institution). All forms required for the application must be completed online; other required documents such as the project description incl. annexes and any additional documents must be uploaded in full before the application can be approved for submission by the research institution. For additional information, please see the elane user manual.

1.3 Who is eligible to apply?

All Austrian research institutions are eligible to apply. The proposed research must be carried out in Austria under the auspices of the Austrian lead research institution. Applications are submitted by the research institution where the project is to be carried out.

The research institution appoints a principal investigator to carry out the project. Neither a specific academic degree nor Austrian citizenship is required to act as principal investigator. The principal investigator must, however, have appropriate scientific qualifications (see section 1.5) and sufficient time resources to carry out the proposed research. The research institution must provide the necessary infrastructure.

The principal investigator must be employed at the Austrian research institution applying for funding at the time the project is scheduled to begin. Their salary is financed either by the research institution or by the project as a grant-salaried researcher (see section 2.3.1.1). If

---

1 Approval for submission by the research institution may be waived by the research institution.
2 Research institutions must be registered in the FWF’s research institution portal.
the principal investigator is employed part-time at the start of the project, project funds can be used to increase the extent of employment to full time.

Researchers who are predominantly working abroad during the project may act as principal investigators if they are employed at the Austrian research institution applying for funding at the time of application and for the entire duration of the project. The extent of employment at the Austrian research institution not funded by the FWF must be at least 25%.

1.3.1 Can multiple applications be submitted simultaneously?

There is no limit to the number of applications that can be submitted by a research institution.

It should be noted, however, that for principal investigators, the number of ongoing/approved projects in the Principal Investigator Projects, International, Clinical Research, and Arts-Based Research programs is limited to a maximum of 3 projects. For further information on restrictions concerning the permissible number of applications and ongoing projects, please see Restriction on the number of projects.

1.4 What types of projects can be funded?

Funding may be requested for projects in basic research that are clearly defined, innovative, with plausibly described objectives and methods, and are limited in duration (no more than 48 months).

Proposals featuring one or more of the following attributes are considered innovative basic research: (i) research on new ideas and/or an investigation of new research questions, (ii) the development or application of new research methods, new technologies, or original approaches to solving research questions, or (iii) the application or modification of existing methods, technologies, or approaches to new research questions. Please note that next logical steps or the incremental further development of published data is not considered to be innovative or original.

If the structure and the content of the project are such as to potentially require subsequent Principal Investigator Projects, please refer to the supplementary information on long-term projects.

---

3 Proof of employment must be submitted to the FWF with the application.
1.5 Who is eligible to apply?

1.5.1 General requirements

The principal investigator’s publication record over the last five years must be internationally visible and commensurate with the expected career path in their field. The following criteria apply for the assessment of an applicant’s publication record and initiation of the review process:

1. **Quality assurance**: Most relevant in assessing the applicant’s publication record are those publications that have been subject to a quality assurance procedure in line with international standards (peer review or an equivalent procedure; in the natural and life sciences, peer review is expected). Journals must usually be listed in Web of Science, Scopus, or the Directory of Open Access Journals (DOAJ). For journals not listed in those databases, or for monographs, edited volumes, contributions to edited volumes, or other publication types, the applicant must provide a link to the publisher’s website which contains a description of the applicable quality assurance procedure. Should no such description be available on the website, it is the applicant’s responsibility to provide evidence that the publication has been subject to a quality assurance procedure in accordance with the standards of the field.

2. **International visibility**: The majority of the applicant’s publications must have a wider than national reach. In the natural sciences, life sciences, and social sciences, most of the publications listed must be in English.

3. **Number/scope and quality** of the publications must be commensurate with the researcher’s expectable career path and the respective discipline. At least two publications must be quality-assured and internationally visible publications with a substantial and independent contribution by the applicant. At least one publication with first, last, or corresponding authorship is required, with the exception of publications in journals (or disciplines) that rank authors alphabetically. If any such publications are included in the required document *PI_publication.pdf* (see section 2.2.4), the applicant’s contribution must be specified.

If there is any uncertainty about general application requirements or about accounting for career interruptions (see sections 1.5.3 and 1.5.4), the FWF recommends contacting the FWF Office or the [FWF unit](#) for equal opportunities in research funding in good time before submitting the application to confirm that all requirements are met and that any career interruptions can be accounted for. In cases of doubt, the appropriate decision-making bodies of the FWF shall decide on applicants’ eligibility.

1.5.2 Equal opportunities, diversity, and inclusion

The FWF [Strategy for Gender Equality and Diversity of Researchers](#) applies. This means that breaks or delays in applicants’ research careers that have led to publication gaps, unorthodox career paths, or limited international research experience can be taken into
account. For further details on accounting for career breaks, please refer to the information sheet on career interruptions.

1.5.3 Consideration of career breaks

The FWF will take justified, documentable career breaks (e.g. due to pregnancy, childcare, childcare, caregiving obligations, military or civilian service, flight, and asylum) into consideration in assessing the principal investigator’s eligibility to apply.

1.5.4 Inclusion of the disabled and chronically ill

The FWF will also take any exceptions to and interruptions of typical career paths due to disability and/or long-term illness into consideration in determining whether the principal investigator meets the application requirements.

1.5.5 Data protection notice

When assessing eligibility, all personal data provided to the FWF by an applicant on a voluntary basis that relates to the information provided in sections 1.5.3 and 1.5.4 shall be taken into account exclusively to the applicant’s benefit (compensation of disadvantages). Relevant information (without sensitive or personal data) can be included in an individual's academic CV, making it available to the reviewers. A general explanation, including the duration of the interruption or delay, is sufficient. Please use the appropriate form for this purpose and give your explicit consent to data processing on the last page. If you wish to submit further supporting documents in addition to those listed in the form please submit them directly to the FWF office. These will not be visible to your research institution. This information is only used to check the application requirements and is not made available to reviewers.

1.6 What types of funding can be requested?

Project-specific costs are eligible for funding. These include personnel and non-personnel costs that are needed to carry out the project and that are not included in the infrastructure provided by the research institution. The FWF does not finance the infrastructure or basic equipment of research institutions.

4 Childcare includes parental leave periods, if applicable.

5 Immediate family members and/or persons living in the same household: Spouses, registered partners, parents, children, adopted, step, and foster children, siblings, parents-in-law, and children-in-law.
In addition, funding may be requested for project-specific work at the associated research institution(s) where associated research partner(s) work. Associated research partners are researchers working on a project-specific basis at other Austrian research institutions (associated research institutions) and who are making a significant scientific/scholarly contribution to the project. The Associated Research Partner form must be completed for these researchers, if applicable. Funds are disbursed from the lead research institution to the associated research institution(s). Associated research institutions report directly to the FWF to account for funds used at their institution.

For information on applying for personnel costs for the principal investigator’s own salary, please see section 2.3.1.1.

Please note that exaggerated cost projections may be grounds for rejection, even if a proposal is otherwise excellent. The number of reviews required before a proposal can be approved for funding is based on the amount of costs requested (see section 3.3).

Multiple funding is not permitted (see FWF Funding Guidelines).

1.7 International programs

For applications submitted for international research funding programs (ERA-NET calls, Joint Projects, etc.) should follow the guidelines for Stand-Alone projects (as described here) or, in the case of clinical research proposals, those of the Clinical Research program.

Please note, however, that these international programs also have additional application requirements. For more information, please see Principal Investigator Projects International or International – Multilateral Initiatives on the FWF website.

2 Application

2.1 Sections of the application

A complete application must include the following sections:

2.1.1 Academic abstract

The academic abstract must be written in English, may not exceed 3,000 characters (including spaces, no formulas or special characters), and is used to inform potential reviewers about the project. The abstract must use the English headings provided below.

- Wider research context / theoretical framework

---

6 Associated research institutions must be registered in the FWF’s research institution portal. Once a proposal has been approved, the lead research institution must enter into a cooperation agreement with the associated research institution.
- Hypotheses / research questions / objectives
- Approach / Methods
- Level of originality / innovation
- Primary researchers involved

Where alternatives are indicated between slashes, please select the alternative that applies to your project.

2.1.2 Project description

Project descriptions are limited to 20 consecutively numbered pages, incl. the table of contents (required), and where applicable, a list of abbreviations, headings, figures, captions, tables, footnotes, etc.

The project description must also include the following annexes on additional pages:

- Annex 1: List of literature cited in the application (References), max. 5 pages
- Annex 2: Information on the lead research institution and any associated research institutions and a plausible justification of the funding requested (see Appendix A)
- Annex 3: CVs and descriptions of previous research achievements
- Annex 4 (optional): Collaboration letters from national and international cooperation partners (max. 1 page per letter)

The project description, including these annexes, must be uploaded as a single file titled Proposal.pdf. The FWF will send this document to the reviewers.

2.1.3 Additional documents

- Required:
  - Two publications written by the applicant must be named, documenting that the applicant fulfills the general requirements to act as principal investigator (publication record, see section 1.5.1)
  - Publication lists for internal FWF use to assess principal investigator’s eligibility to apply and to check for conflicts of interest with potential reviewers

- Where applicable:
  - Results or final project report: If the project submitted is the continuation of an FWF-funded project (follow-up application), a report on previous results or a final project report and a list of publications resulting from the project must be uploaded in the language of the application (max. 6 pages).
• Additional documents in the case of resubmission: If the application is a revised version of a previously rejected application (see section 2.4), a response to the reviews and an overview of all changes made in the resubmitted application must be uploaded.

• Cover letter accompanying the application (optional)

• List of max. 3 researchers (optional) - including, if applicable, reviewers of a rejected proposal - who are to be excluded from the review process (see section 3.2), with a brief justification

Any additional documents (e.g., recommendations on potential reviewers, letters of recommendation, forthcoming publications) will not be considered in further stages of the application process.

2.1.4 Forms to be completed

• Required: Research institution assignment form, Contact form, Program-specific data form, Cost breakdown form, Academic abstract form, and Co-authors form

• Where applicable: Associated research partner form, Other cooperation form

2.2 Application content and form

2.2.1 Language of application

To allow applications to be reviewed by international scientific or scholarly experts, applications must be submitted in English. If desired, a version in German or another specialist language may be added as a supplement. Submission solely in German or another specialist language other than English is only permitted in exceptional cases. Such exceptions apply exclusively to applications from the fields of linguistic and literary studies involving only texts in German or languages other than English. In all such cases, it is absolutely necessary to consult the project officers in the respective FWF specialist department prior to application. An academic abstract for the project as well as a brief yet convincing statement explaining why submission in a language other than English is justified for substantive academic reasons will be required. The final decision shall be made by the relevant decision-making bodies of the FWF.

2.2.2 Project description: Scope and formatting requirements

The project description may not exceed 20 pages. It must contain a table of contents with page numbers. Optional components such as a list of abbreviations or figures, captions, tables, footnotes, etc. are to be included in the 20-page limit.

The continuous text in the project description, annexes 1-3, the publication lists, and the additional documents specified in section 2.1.3 where applicable, must be written, without
exception, in 11 pt. font with 1.5 line (15-20 pt.) spacing and at least 2 cm margins. A standard, easily legible font must be used for the body text. The form requirements (font type and size, line spacing, and margins) of the project description also apply for the additional documents, except for documents not prepared by the applicant, such as collaboration letters.

Citations in the text and the list of works cited (References) in the application must be in line with the conventions of the respective discipline, preferably according to a widely used style guide (e.g., Chicago Manual of Style, APA Publication Manual). The choice of citation conventions or style guide is up to the applicant, but must be implemented consistently throughout the application. If available, a DOI address (DOI = Digital Object Identifier) or another persistent identifier should be provided for the literature cited.

### 2.2.3 Project description and annexes

The project description may not exceed 20 pages and must include a table of contents as well as the following sections, each designated by headings:

1) Table of contents

2) State of the art of relevant international research (including own preliminary work, if applicable) and relation of the project to this context

3) Clearly defined aims and hypothesis/hypotheses or research question(s) of the project

4) Description of the project’s anticipated level of originality or scientific/scholarly innovation

5) Methods

6) **Associated research partners** (if applicable): Description of the contributions of the associated research partners (see section 1.6) to the proposed research; associated research partners must be named in the Associated research partner form.

7) **National and/or international cooperation partners** (if applicable): Please specify the intended cooperation partners and the subject of the intended cooperation(s) or the planned contribution to the project. All national and/or international cooperation arrangements that were stated to be essential in the project description must be listed on the Other cooperation form (one form must be completed for each cooperation partner) and may be confirmed by a collaboration letter.

8) Work plan and timeline

9) Research-related qualifications of the researchers involved
10) All potential ethical, safety-related, or regulatory aspects\(^7\) of the proposal and how applicants plan to deal with them must be described in this section. These questions should be addressed briefly in the text even if the applicant believes the project does not raise any such issues.

11) Any potential sex-specific and gender-related aspects\(^8\) of the proposal must be detailed. To what extent are sex-specific and gender-related aspects considered in the proposal? How will they be integrated into the research approach? These questions must be briefly addressed, even if the applicant does not feel that the project involves any such aspects.

**Annex 1:** List of literature cited in the application (*References*) on no more than 5 pages

**Annex 2:** Financial aspects

The template for the description of projected costs can be found in *Appendix A*.

- Information on the lead research institution and the research institutions of associated research partners
  - Existing project participants (not financed by FWF project funds) (usually the principal investigator and academic project staff at the research institutions)
  - Available infrastructure

- Information on the funding requested
  - Explanation of why the personnel requested is needed (type(s) of requested position(s), job descriptions, extent of employment, and duration of involvement in the project)
  - Concise justifications for non-personnel costs (equipment, materials, travel expenses, and other costs); If funding for equipment is requested, applicants must explain why this does not constitute part of the basic equipment of the given research environment – see section 2.3.2).

**Annex 3:** CVs and description of previous research achievements

The academic CVs and research achievements (for the principal investigator as well as a maximum of 3 other key project participants) should be described on no more than three pages per person, as specified below.

**Required contents for academic CVs**

---

\(^7\) For instance, the European Commission’s *Ethics for Researchers* or *The European Code of Conduct for Research Integrity* can serve as a guide here.

\(^8\) Positioning and thoughts on the research approaches in the project in terms of sex-specific and gender-related aspects could include: Is the research approach likely to produce sex-specific and gender-related findings? If so, what findings? How and where are these integrated into the research approach? For information on determining the relevance of sex-specific and gender-related issues, please see the FWF website.
• **Personal details**: Personal details (name, researcher unique identifier(s) such as ORCID, research ID, etc., no photos), address of research institution, and relevant websites. In addition, a publicly accessible link to the list of all published publications is required.

• **Education**: List of academic milestones

• **Position(s)**: List of academically relevant positions (with the extent of employment in the case of part-time employment)

• **Career breaks** (if any): List of career breaks or delays (see also section 1.5.2)

• **Net research experience** (optional): The length of time (in years and months) that has actually been used in net total for research – calculated in such a way as to be equivalent to full-time employment – and broken down into the time before and after completion of the applicant’s doctoral degree. This is intended to make it easier for the reviewers to assess the principal investigator’s qualifications in term of academic age.

• **Research interests**: Description of the main areas of research and the most important research results achieved to date

• **Academic publications**: List of no more than ten of the most important published or accepted academic publications (journal articles, monographs, edited volumes, contributions to edited volumes, proceedings, etc.); for each publication, either a DOI address or another persistent identifier should be indicated, if available. In accordance with the Agreement on Reforming Research Assessment, journal-based metrics such as journal impact factors, Article Influence Scores, or the h-index should not be included.

• **Additional research achievements**: List of no more than ten of the most important research achievements apart from academic publications, including achievements such as freely accessible research data including software and codes, awards, contributions to conferences, keynote lectures, significant research projects, peer review activities, promotion of junior researchers, exhibitions, interactions with society (including citizen science or transdisciplinary activities), science communication, knowledge transfer, licenses, or patents. If available, a persistent identifier or link to the research achievement must be provided.

**Annex 4** (optional): Collaboration letters

Collaboration letters (each no more than 1 page) from national and international cooperation partners who are named in the project description as being essential for the implementation of the project and whose role is plausibly described.

### 2.2.4 Publication output

The following two separate uploads are required:
• **Pl_publication.pdf**: Two publications written by the applicant must be named, documenting that the applicant fulfills the general requirements to apply (see Template *Pl-publication*). The FWF will base the applicant’s eligibility to apply on these publications.

• **Publication_lists.pdf**: A list of all research publications over the last five years[^9] (categorized as “quality-assured publications” and “other publications,” see section 1.5) of all participants for whom a CV has been submitted, as well as for all project staff members for whom personnel costs are requested, in one PDF document. This publication list helps the FWF to determine if there are any potential conflicts of interest with reviewers. It will not be forwarded to the reviewers.

### 2.3 What project-specific costs can be funded?

When requesting funding, the regulations of the respective research institution and the FWF guidelines apply. The requested funds must be summarized in the elane Cost breakdown form.

Funding may only be requested for the following cost categories.

#### 2.3.1 Personnel costs

Funding may only be requested for personnel who are needed in addition to existing personnel resources for the realization of the project and only to the extent required for the project.

Full- or part-time employment contracts (*Dienstverträge*, DV) and contracts for marginal employment (*geringfügige Beschäftigung*, GB) are available for project staff. FWF’s standard personnel costs apply.

Employment contracts for doctoral students may not exceed 75% employment (up to 30 hours per week). A part-time (50%) employment contract of 20 hours/week for student employees may be requested for researchers who have not yet completed a graduate degree program in the relevant subject area.

When requesting funding for PROFI (project funding via research institutions)-eligible standard personnel costs, a fixed percentual increase must be included for the subsequent year to compensate for wage raises (see Standard personnel costs and salaries for PROFI projects 2023).

[^9]: Publication lists must include: all authors, complete titles, journal, year, and page numbers. For each publication, if available, either a DOI address or another persistent identifier should be indicated; for publications with more than 20 authors, an “et al.” citation can be used.
2.3.1.1 Grant-salaried principal investigators

The FWF understands “own position” to mean that the principal investigator’s salary is financed by the funds of the research project.

Applying for funding (including partial funding) of one’s own position is possible for every principal investigator, regardless of whether they are in permanent or long-term employment at the time of application. The senior postdoc salary rate\(^\text{10}\) applies for the principal investigator’s own position (pro-rated accordingly in the case of partial funding).

Female principal investigators whose own position is funded to the extent of at least 50% have the additional option of applying for up to €2,000 per year in the category of “Other costs” for personal coaching and further training measures that directly contribute to their career development. Coaching is understood to mean individual counselling and support processes in a professional context. Continuing education activities eligible for funding include courses on scientific – in particular, subject-specific – skills (e.g., courses on methodological skills) and personnel development measures such as those offered at some research institutions (e.g., in teaching, academic writing, writing funding applications [especially in English], personnel management and project management, conflict- and problem-solving skills, academic organization, and vocational training and other seminars directly related to career development, e.g., programs for the advancement of women).

2.3.2 Equipment costs

Funding for equipment may only be requested if it is specifically required for the project and if it is not part of the existing infrastructure of the participating research institution(s). “Infrastructure” is defined to include all equipment (and components thereof) that a modern research institution needs to conduct basic research in the relevant discipline at an internationally competitive level. This means that equipment such as computers (laptops, etc.) is considered to be part of the standard infrastructure and no funding will be approved for these items.

Equipment eligible for funding includes:

- Scientific instruments
- System components
- Self-constructed devices (generally assembled from smaller pieces of equipment and materials)
- Other durable goods
- Intangible assets such as concessions, industrial property rights, and licenses derived from such rights

\(^{10}\) The senior postdoc rate can only be requested to fund the principal investigator’s own position; the postdoc salary rate applies for project staff members at the postdoc level.
Equipment with an acquisition value in excess of €250,000 can only be financed through depreciation. Only the percentage of costs that are incurred during the project period can be requested and financed. The depreciation rules of the research institution acquiring the equipment apply.

If funding is requested for a piece of equipment which is required specifically for the project, the lead research institution must submit the Affirmation of the lead research institution form to confirm that they have verified that no comparable equipment that could be used or shared is available within a reasonable distance, and that third-party (co-)financing options have been explored. The research institution that owns the equipment must also ensure that any possible costs arising from the use, maintenance, and repairs of the equipment are covered.

The principal investigator is to instruct their research institution to order the equipment and effect payment accordingly. The principles of economy, efficiency, and expediency apply to any acquisition. The procurement guidelines of the research institution and the provisions of the Federal Procurement Act 2018 (Bundesvergabegesetz) as amended apply.

In order to determine the equipment costs (incl. VAT, unless the research institution is entitled to deduct VAT) to be requested, vendor quotes must be obtained before the application is submitted pursuant to the research institution’s procurement guidelines. Vendor quotes are submitted to the FWF only upon request.

2.3.3 Material costs

“Materials” is defined as consumables and small items of equipment (cost per item less than €1,500 incl. VAT).

The calculation of funds requested for project-specific material costs should be justified with reference to the timelines, work plans, and experiment plans. Experience from previous projects should be considered in making the calculations.

2.3.4 Travel costs

Funding may be requested for project-specific travel and accommodation, field work, expeditions, etc. The project description must include a detailed itinerary, broken down by project staff members. This plan must indicate which staff members will be travelling, the destination, for what purpose, when (in which year of the project), for how long, and how much the travel will cost.

When planning travel in connection with a project, researchers should always carefully consider whether travel is absolutely necessary or whether the relevant information can be exchanged virtually.

If a project requires travel, transportation by train is preferred to travel by air as a contribution to environmental sustainability. Funding can be requested for any resulting extra costs such
as an additional overnight stay. When travelling by air, it is strongly recommended to make a CO₂ offset contribution, which can be requested as part of the travel expenses or funded through the budget for general project costs. A CO₂ offset contribution can be requested for up to 15% of the ticket price.

Travel expenses for researchers from Austrian and international research institutions other than the lead research institution or associated research institutions can only be granted in exceptional cases. Grounds for the exception must be provided in detail.

Travel and accommodation costs are generally calculated according to the lead or associated research institution’s individual travel expenses policies. If no such policies are in place at the research institution, the federal regulations governing travel costs (Reisegebührenvorschrift des Bundes 1955, RGV) as amended apply.

2.3.5 Costs as part of national and international cooperation(s)

Unlike when cooperating with associated research partners (see section 1.6), costs arising in the context of a research collaboration with an external research institution are to be borne by that research institution. This does not apply to cooperation arrangements with scientists or scholars from developing countries (see section 2.3.6).

Funds may only be transferred directly to a cooperation partner (in Austria or abroad) upon presentation of an invoice and only if they are in payment for clearly defined commissions or services and immediately necessary to carry out the Austrian project.

2.3.6 Other funding available

- Independent contractor agreements (costs for work of clearly defined scope and content carried out by individuals, provided that they are cost-efficient and justified in the context of the research project)

- Costs for the preparation, archiving, open access, and reuse of research data in repositories in accordance with the FWF’s Open-Access Policy

- Costs that cannot be included under personnel, equipment, materials, or travel costs, for example:
  - The use of research facilities, e.g., costs for the project-specific use of available equipment (project-specific “equipment usage time”) or large research facilities
  - Any laboratory animals necessary for the project

11 The amount of a CO₂ offset contribution for flights can be calculated, for example, using the CO₂ calculator on the Climate Austria website.
• Project-specific work carried out outside the researcher’s research institution (e.g., for analyses carried out elsewhere, interviews, sample collection, etc.)

• Disposal of project-specific hazardous waste

• Cooperation arrangements with researchers in developing countries

The procurement guidelines of the research institution and the provisions of the Federal Procurement Act 2018 (Bundesvergabegesetz) as amended apply.

2.3.7 General project costs

The approved grant sum includes 5% general project costs that are permitted for funding but cannot be requested individually using the abovementioned cost categories. They are subject to the FWF’s Funding Guidelines and the costs must be eligible for funding. These include, for example, costs for conference travel, dissemination activities as well as smaller, unforeseen costs necessary for the project.

Overhead costs for the research institution are not included in general project costs.

General project costs are to be entered in the appropriate field in the Cost breakdown form and calculated as 5% of the total funding requested. General project costs impact the number of reviews required for the proposal (see section 3.3). No justification for general costs is needed in Appendix A.

2.3.8 Publication costs

Publication costs cannot be requested as part of the application process. Information on funding options for publications resulting from FWF-funded projects can be found on the FWF website at Funding Portfolio Communication.

2.4 Resubmitting a previously rejected application

A resubmission is defined as the revision of an application addressing the same or similar research questions as a proposal the FWF has previously rejected, regardless of the program category. If an application is submitted on the same or a very similar research question and if, in the view of the principal investigator, this application is not a resubmission but a completely new project, this must be explained in a separate accompanying letter to the FWF Office. For example, changes in research methods alone are not sufficient for a proposal to qualify as a completely new project. In cases of doubt, the appropriate decision-making bodies of the FWF shall decide.

Resubmissions must show changes from the rejected application. If an application has been rejected for the reasons C3, C4, and C5, these changes need to be substantial (based on the
comments in the reviews). If no such changes are made, the FWF’s decision-making bodies will return the application to the applicant without review.

When resubmitting an application, the following documents must be uploaded:

• An accompanying letter containing an overview of all changes made in the resubmitted application must be submitted to the FWF. This overview will not be passed on to the reviewers.

• A response to all reviews of the rejected application must be provided, even if one of the reviewers is to be excluded from reviewing the resubmitted application (see section 3.2). This response, consolidated in one document, will be forwarded to all reviewers reviewing the resubmission and should address the recommendations and criticisms included in the previous reviews as well as describe the resulting changes made.

While no deadlines for the resubmission of a rejected application apply, the respective application requirements do need to be taken into account. Resubmissions must be submitted as described in section 2.1, i.e. as a separate, new application and not as a supplementary application to the previously rejected proposal.

2.5 File formats, file names, and online forms

Overview of all documents and forms to be submitted:

2.5.1 Required components of an application

a) Files:

• Proposal.pdf (project description incl. annexes 1-3 and where applicable 4, with PDF bookmarks, at least for the major sections)
• PI-publication.pdf (Two publications written by the principal investigator must be named, documenting that the applicant fulfills the general requirements to apply)
• Publication_lists.pdf (publication list of all the key project participants for the last 5 years, broken down into “quality assured publications" and “other publications”)

b) Forms:

• Research institution
• Contact form
• Application form
• Cost breakdown
• Academic abstract in English
• Co-authors
• Associated research partners (if applicable)
• Other cooperation (if applicable; for national and international cooperation partners)
2.5.2 File uploads, if applicable

- *Cover_letter.pdf* (= accompanying letter; optional)
- *Negative_list.pdf* (= reviewers who should be excluded; optional)
- *Follow.pdf* (= result report or final project report of the previous project for follow-up applications; will be forwarded to the reviewers)
- *Overview_Revision.pdf* (= for resubmissions, overview of all changes made in the resubmitted application)
- *Revision.pdf* (= for resubmissions, response to all reviews of the previously rejected application)

3 Processing and decision-making

3.1 Submission and requests for changes

All of the documents specified above must be uploaded in full to elane. Once an application has been officially submitted, the research institution and the principal investigator can make no further changes to the application themselves. All applications are checked for completeness and any formal errors by the FWF Office. If the FWF Office identifies issues with the application that it considers to be rectifiable, it will notify the research institution and the principal investigator, giving them the opportunity to correct the problems within a reasonable period of time (generally 3 weeks). The requested changes are to be submitted to elane as a supplementary application and approved for submission by the lead research institution if necessary. If the requested changes are not made and submitted as a supplementary application before the specified deadline, the decision-making bodies at the FWF will return the application without review.

Similarly, applications will not be reviewed if they have been previously rejected by the FWF and resubmitted without appropriate revisions (see section 2.4).

The most common reasons why applications are returned without review by the FWF’s decision-making bodies are (a) that the principal investigator’s publication record does not meet the requirements (see section 1.5.1) and (b) that the application does not address specific hypotheses or research questions (see section 2.2.3).

Once the review process has begun, no more changes can be made to the application.

3.2 Excluding reviewers

A list of a maximum of three potential reviewers who should not be consulted to review the proposal due to a possible conflict of interest can be uploaded as an additional document. The applicant must give reasons why they wish to exclude these reviewers. If the reasons for exclusion are professionally and technically sound, the FWF will generally fulfil the
applicant’s request to exclude those reviewers from the review process. A detailed description of the FWF’s policy on conflicts of interest can be found in the General Principles of the Decision-Making Procedure.

Please note that the FWF does not wish to receive, nor will it consider a list of potential reviewers from applicants.

3.3 Number of reviews required

The number of reviews required for funding approval depends on the amount of funding requested. For funding requests of up to €450,000, at least two reviews are needed; for each additional €200,000, at least one further review is required (e.g., up to €650,000 at least three reviews, and so on). The average processing time increases significantly with an increase in the number of required reviewers.

3.4 Decision-making process

For detailed information on the decision-making process, the criteria for selecting international reviewers, detailed rules concerning conflicts of interest, and the composition of juries and review panels, please see the General Principles of the Decision-Making Procedure.

The review process for Principal Investigator Projects usually takes about six months. More detailed information is available online on the FWF Dashboard.

When the review process is completed, the FWF Board considers the reviews and decides whether the proposal should be funded. The lead research institute and the principal investigator are informed in writing of the FWF’s decision.

3.5 Reasons for rejection

The reasons for rejecting an application are assigned to one of five categories (C1–C5) and communicated to the principal investigator and the lead research institution; the principal investigator is also sent anonymized copies of the reviews. A detailed description of the reasons for rejection can be found in the General Principles of the Decision-Making Procedure.

3.6 Reviewing resubmissions

If the application is a resubmission of a previously rejected proposal, the FWF will generally contact those reviewers who provided constructive criticism on the previous application. Reviewers who gave entirely positive or negative comments will usually not be contacted for a second review. However, please note that generally all resubmissions are also evaluated by new reviewers.
3.7 Proposal bans

Applications that are rejected for reason C5 will be barred for 12 months (from the date of the decision) and cannot be resubmitted during that period.

Applications that have been submitted three times and rejected for reasons C3 or C4 (i.e. the original application and corresponding resubmissions) are also blocked for 12 months (from the date of decision); rejections for reasons C1 or C2 are not included in this total. In principle, only topics are blocked and not applicants or research institutions.

4 Compliance with legal requirements and standards of research integrity

4.1 Legal regulations

Please note that the research institution is obligated to comply with all legal requirements and safety provisions (e.g., Federal Disabilities Act) that apply for the Principal Investigator Project and obtain all the necessary permits (e.g., from the Ethics Commission, the Commission for Animal Experimentation, the Federal Monuments Authority Austria, or the relevant foreign authorities).

4.2 Academic integrity

The Guidelines for Good Scientific Practice of the Austrian Agency for Research Integrity (ÖAWI) apply.

Where a breach of these standards is suspected, the ombud of the respective research institution is responsible for investigating the issue. Research institutions are required to report any cases of suspected serious violations of the standards to the ÖAWI. The FWF reserves the right to suspend, in part or in whole, any procedures related to applications or ongoing projects until this check or investigation has been concluded. For more detailed information, see FWF procedure in cases of suspected violation of the standards of good research practice.

5 Data protection and publication of project data and results

5.1 Data protection

Regarding personal data, pursuant to Art. 6 (1) item a of the General Data Protection Regulation (GDPR), the applicant or applying research institution consents to the processing
of personal data and other data (e.g., title of the project submitted, research institution, academic abstract, PR summaries) necessary for the administration of the funding by the FWF – while safeguarding business and trade secrets – for the purposes of research policy (e.g., presentation of the development of basic research in Austria, economic analyses, funding impact reports, etc.), and for public relations work (publication of excerpts in the FWF annual report, on the FWF website, in press releases, media collaborations, etc.) and to the passing on of this data to third parties (e.g., for use in research policy studies). This consent can be revoked at any time in full or in part in writing to the FWF with effect for future data processing. Further information on the data privacy rights of the applicant or applying research institution as well as the contact details of the FWF’s data protection officers is available here.

5.2 Publication of project data and results

Please note that if a grant is awarded, a PR summary in German and English will be published on the FWF website, as well as the grant amount and later, PR summaries of the project’s findings in German and English. Summaries must be submitted to the FWF when the grant agreement is returned. The principal investigator must ensure that these texts are worded in such a way that legitimate interests of secrecy for reasons of national defense and patent law are safeguarded and business secrets are protected appropriately. Information on the writing of PR texts can be found here.

In addition, the FWF requires a data management plan (DMP) for all approved projects. This plan should also be sent to the FWF when returning the grant agreement. The template for the DMP can be viewed and downloaded here.

The guidelines specified in the grant agreement on acknowledging the FWF as the funding institution and the FWF’s Open-Access Policy apply for any publication of project results (e.g., academic publications, research data, conference contributions, and media reports).
6 Appendices to the Application Guidelines

6.1 Appendix A: Information on the research institute and description of financial aspects

Information on the lead research institution and any associated research institutions and the description of project finances must be presented in English using the following structure and appended to the project description as Annex 2. Costs must be broken down and adequately justified for each point below. The list of and justification for the requested funds must correspond to the costs indicated in the Cost breakdown form.

a) Details on the research institution of the applicant and – if applicable – of associated research partners\(^\text{12}\)

- Existing personnel (not financed by the FWF, usually the principal investigator and research personnel at the research institution(s))
- Existing infrastructure

(b) Information on the funding requested:\(^\text{13}\)

- Explain briefly why the personnel requested is needed for the project (type(s) of requested position(s), job descriptions, extent of employment, and duration of involvement in the project);
- Explain briefly why the non-personnel costs requested are justified (equipment, materials, travel, and other costs). If funding for equipment is requested, applicants must explain why this does not constitute part of the basic equipment of the given research environment - see also Section 2.3.2

List of and justification for

Personnel costs:

Equipment costs:

Material costs:

Travel expenses:

Other costs (including independent contractor agreements for work and services):

---

\(^{12}\) In the case of international programs (joint projects), information on the research institution(s) of the foreign project partner(s)

\(^{13}\) In the case of international programs (only Joint Projects in Lead Agency procedure): list of and justification for the requested funds for the part(s) of the project conducted abroad
6.2 Appendix B: Notes and questions for reviewers of Principal Investigator Projects\(^4\)

The FWF actively supports equal opportunities and equal treatment in all of its programs. The review of an application must not put applicants at a disadvantage for non-research-related reasons such as age, gender, etc. For example, instead of considering the applicant’s actual age, the review process should focus on how the length of the individual’s research career corresponds to their research achievements to date.

Our commitment to equal opportunities also means considering breaks or delays in applicants’ research careers (e.g., due to parental leave; long-term or chronic illness; disability; caring responsibilities; etc.), which may have led to publication gaps, atypical career paths, or limited international research experience. Please also see our information for reviewers on unconscious bias in the decision-making process.

Only the ten most important academic publications and the ten most important additional research achievements of the applicant are to be considered when evaluating the application. As a signatory to the Agreement on Reforming Research Assessment, the FWF also emphasizes that, in assessing research performance, reviewers should refrain from using journal-based metrics such as journal impact factors, Article Influence Scores, or the h-index.

Please review the current proposal\(^5\) based on the following six assessment criteria: 1) innovation and novelty, 2) quality of the proposed research, 3) approach and feasibility, 4) researchers’ qualifications, 5) ethics, sex and gender, and 6) overall evaluation. For each of these criteria except 5) we ask you for both written comments and a rating on a scale from “outstanding” to “poor.” Please be aware, however, that the FWF’s funding decision will be based primarily on reviewers’ written assessments rather than the ratings assigned.

Please keep in mind that sections 1 and 2 will be forwarded to the applicant in full and in anonymous form. If the proposal is approved, the research institution may have access to the anonymized reviews submitted to the applicant.

\(^{14}\) Further information can be found on our website: FWF’s corporate policy and mission statement and the Application Guidelines for Principal Investigator Projects

\(^{15}\) The project proposal must meet the FWF’s formal requirements. Please bear these in mind when writing your review. (Key formal requirements: 20 pages max. for the project description including figures and tables; 5 pages max. for the list of references; 3 pages max. for each academic CV, including a description of previous research achievements and the ten most important publications. For further details, please see the Application Guidelines for Principal Investigator Projects.)
Section 1:*

1. **Innovation and novelty**
   Is the proposed research innovative? Does it make an original contribution to its field?

2. **Quality of the proposed research**
   Are the research questions formulated clearly? Are they timely, challenging, and likely to lead to relevant insights?

3. **Approach and feasibility**
   Is the research design well-conceived, clearly formulated, and suitable for answering the research question(s)? Is there a well-organized work plan? Have the methods been chosen well and does the proposal describe them in sufficient detail?

4. **Research-related qualifications of the researchers involved**
   How well are the researchers qualified to carry out the proposed research? How would you assess the academic qualifications the applicant, their team and cooperation partners? In evaluating their qualifications, please consider their career stage, taking unorthodox career paths and circumstances that may have slowed down their progress (e.g., parental leave, long-term or chronic illness, disability, caregiving responsibilities) into account.

5. **Ethics, sex and gender**
   *Ethics:* Have ethical considerations been addressed satisfactorily?
   *Sex-specific and gender-related aspects:* Applicants are required to address any relevant sex-specific and/or gender-related elements inherent in research questions and/or research design. Please assess whether the treatment of these components is adequate.

6. **Overall evaluation**
   What is your overall impression of the proposal? Specifically, what would you consider its key strengths and weaknesses? Please give reasons for your answers, taking as much space as you need.

---

*Additional questions for international programs: International cooperation(s) – How well integrated are the parts of the project in Austria and in the partner country/countries? How would you rate the complementarity of the scientific contributions of the scientists in Austria and abroad?*
Section 2: Optional recommendations for the applicant

If you are in favor of the project being funded, you may want to add to the formal assessment in section 1 by making further and perhaps more informal comments or suggestions here. However, please note that these remarks, too, may also have an impact on the FWF’s funding decision, especially if they amount to substantive criticism of the project.

Section 3: Confidential remarks to the FWF

Please use this space to make any comments that you do not want submitted to the applicant. Feel free to also give us feedback about the evaluation process and your interactions with us.
