In accordance with its Funding Guidelines dated January 1, 2022 (as amended), the FWF has issued the following Application Guidelines for

**Top Citizen Science**

Vienna, January 8, 2024,
Contents

1 General Information ........................................................................................................................................ 4
  1.1 Program objective ................................................................................................................................... 4

5.2 Publication of project data and results ............................................................ 21
6.1 Appendix A: Information on the research institution and description of financial aspects ........................................................................................................... 22
6.2 Appendix B: Notes and questions for reviewers of Top Citizen Science projects .... 23

Please note: Explanations of the terms used in the Application Guidelines can be found in the Definition of Terms (PROFI mode).
1 General Information

1.1 Program objective

The aim of the Top Citizen Science program (hereinafter also referred to as TCS) is to promote citizen participation in research projects. Citizens should have the opportunity to contribute their skills, expertise, and curiosity, without impacting the high quality of the research work. Involving citizen scientists has the potential to generate new research questions, open up new approaches to the field, expand researchers’ range of skills, and accelerate innovation processes. Opening up the research to involve citizens does not have to generate added value in all of the categories listed as examples, but each project must be expected to generate substantial additional findings. The program is also intended to help bring research processes and researchers’ work closer to the general public and break down existing barriers between science and society.

Projects are headed by an individual researcher (hereinafter referred to as the applicant or principal investigator).

1.2 Submission

The deadline for submission (i.e. approval of the application for submission by the research institution) is April 8, 2024 (2:00 pm local time Vienna). All proposals must be submitted online using the elane digital application portal. Project funding is administered through the research institutions (PROFI); this means the application must be approved for submission by both the applicant and the respective research institution (= lead research institution). All forms required for the application must be completed online; other required documents such as the project description, including annexes and any additional documents, must be uploaded in full before the application can be approved for submission by the research institution. For additional information, please see the elane user manual.

1.3 Who is eligible to apply?

All Austrian research institutions at which FWF projects are already being funded are eligible to apply, because an approved FWF project is required to serve as a basis project for a TCS extension project. The TCS extension project must be carried out in Austria or under the auspices of the applying Austrian research institution. Applications are submitted by the research institution where the project is to be carried out.

---

1 Approval for submission by the research institution may be waived by the research institution if it has authorized the applicant to approve it themselves.
2 Research institutions must be registered in the FWF’s research institution portal.
3 Projects funded under the programs Clusters of Excellence, Erwin Schrödinger, Book Publications, Digital Publications, Academic Journals, Top Citizen Science, or Science Communication are not eligible as basis projects.
The research institution appoints a principal investigator (PI) to carry out the project. This person must either be leading or have led an FWF-funded project or have an FWF-funded position as a project staff member in the existing basis project. The principal investigator must also have the appropriate qualifications and sufficient time resources to carry out the proposed research. The research institution must provide the necessary infrastructure.

If the applicant is a staff member of the existing basis project, a declaration of support from the principal investigator of the basis project must be provided. This declaration should state that the application is the only TCS application for the FWF basis project.

If the TCS extension project is based on international research projects that are being or have been carried out in different countries (e.g. projects within the framework of a D-A-CH agreement), only the principal investigator in Austria is eligible to apply.

1.3.1 Can multiple applications be submitted simultaneously?

There is no limit to the number of applications that can be submitted by a research institution. Only one TCS extension project may be applied for per existing FWF basis project. Likewise, only one TCS application may be submitted per person. In the case of collaborative programs, either the coordinator or another consortium member may apply. In Special Research Areas, all consortium members can submit a proposal for a TCS extension project. This means that if the basis project is part of a Special Research Area, there can be more than one TCS extension project.

TCS extension projects do not count towards the number of possible applications or projects that a principal investigator can lead pursuant to the Application and project number limit.

1.4 What types of projects can be funded?

Funding is available for the expansion of existing FWF-funded basis projects through the addition of citizen science components; basis projects must be suitable in content and methodology. TCS projects have a maximum duration of two years.

Citizen science\(^4\) encompasses all activities of individuals who contribute to the generation of scientific knowledge in a non-professional capacity; it is understood here as the active involvement of citizens and their skills, expertise, commitment, and resources in scientific research and the acquisition of scientific knowledge. The objective is to address citizens of different ages, genders, and social backgrounds as well as people with highly specialized knowledge and expertise, so-called knowledge communities; young target groups are expressly included.

\(^4\) See also: White Paper - Citizen Science Strategy 2030 for Germany.
Citizens can be involved in the following categories, depending on the extent of their expertise and/or their commitment and/or the resources they contribute:

- **Crowdsourcing**: Involvement of citizens in data collection and/or processing
- **Distributed intelligence**: Involving citizens in data analysis and interpretation
- **Participatory science**: Involving citizens in the further development of methods, tools, and/or products
- **Collaborative science**: Involvement of citizens in problem definitions, development of research questions, and/or quality criteria

Citizens can be involved in various phases of the planning and implementation of a research project. Involvement does not have to be realized in all of phases throughout the course of a project as listed below, and the type of involvement can also change throughout the course of the project.

- **Agenda** (topic definition/finding)
- **Data creation** (data generation/collection)
- **Investigation** (research work)
- **Dissemination** (science communication)

Please note: Involving citizens without tapping their expertise, i.e. solely as research subjects or data sources (e.g. as test subjects, survey participants, etc.), is not a component of citizen science in this sense and not eligible for funding under the provisions of this program.

### 1.5 What requirements must be met to apply?

The prerequisite is an existing, approved FWF project (basis project) that has not yet been completed at the time a decision is made on the extension project being applied for (project ending date on or after January 31, 2025).

This existing FWF basis project ensures the scientific quality of the research on which the proposed project is based. Quality assessment of the submitted TCS extension projects with regard to the expected additional scientific gain and other effects such as social impacts, etc. is carried out as part of a review process conducted by the FWF.

### 1.6 What types of funding can be requested?

The maximum amount of funding that can be requested is €100,000 per application (including the 5% general project costs).

Project-specific costs are eligible for funding. These include personnel and non-personnel costs that are needed to carry out the project and that are not included in the infrastructure provided by the lead research institution. The FWF does not finance the infrastructure or basic equipment of research institutions.
In addition, funding may be requested for project-specific work at associated research institution(s) where associated research partner(s) work. Associated research partners are researchers working on a project-specific basis at other Austrian research institutions (associated research institutions) and who are making a significant scientific/scholarly contribution to the project. The Associated research partner form must be completed for these researchers, if applicable. Funds are disbursed from the lead research institution to the associated research institution(s). Associated research institutions report directly to the FWF to account for funds used at their institution.

The financing of non-cash and cash prizes is generally permissible if it is deemed necessary for the communication activities or the project itself. It is up to the reviewers to assess whether or not this is necessary (see section 3). In the event of approval, the FWF advises applicants to seek external legal advice on the organization of the competition (in particular with regard to tax treatment). The principal investigator must include documentation of the specific use of the prizes (names of the prize winners and description of prizes) with the statement of costs.

For information on applying for personnel costs for the principal investigator’s own salary, please see section 2.3.1.1.

Please note that exaggerated cost projections may be grounds for rejection, even if a proposal is otherwise excellent.

Multiple funding is not permitted (see FWF Funding Guidelines).

2 Application

2.1 Sections of the application

A complete application must include the following sections:

2.1.1 Academic abstract

The academic abstract must be written in English, may not exceed 3,000 characters (including spaces, no formulas or special characters), and is used to inform potential reviewers about the project. The abstract must use the English headings provided below.

- Wider research context / theoretical framework
- Hypotheses / research questions / objectives

---

5 Associated research institutions must be registered in the FWF's research institution portal. Once a proposal has been approved, the lead research institution must enter into a collaboration agreement with the associated research institution.
• Approach / methods
• Level of originality / innovation
• Primary researchers involved

Where alternatives are indicated between slashes, please select the alternative that applies to your project.

2.1.2 Brief information on the existing FWF basis project (max. 2 pages)

Page 1: Weblink to the existing FWF basis project, project ID number, project content, objectives, duration, collaboration partners, and funding amount

Page 2: Status quo of the research work

2.1.3 Project description

Project descriptions are limited to 10 consecutively numbered pages, including the table of contents (required), and where applicable, a list of abbreviations, headings, figures, captions, tables, footnotes, etc.

The project description must also include the following annexes on additional pages:

• Annex 1: List of literature cited in the application (References) on no more than 5 pages
• Annex 2: Details of the lead research institution and any associated research institutions and a plausible justification of the funding requested
• Annex 3: CVs and descriptions of previous research achievements (see section 2.2.3, Annex 3)
• Annex 4 (optional): Collaboration letters from national and international cooperation partners (max. 1 page per letter)

The entire project description, including these annexes, must be uploaded as one file entitled Proposal.pdf. The FWF will send this document to the reviewers.

2.1.4 Additional documents

• Required:
  • Publication lists for internal FWF use to assess eligibility to apply and to check for conflicts of interest with potential reviewers

• Where applicable:
  • If the applicant is a staff member of the existing basis project, a declaration of support from the principal investigator of the basis project
• Results or final project report: If the project submitted is the continuation of an FWF-funded TCS extension project (follow-up application), a report on previous results or a final project report and a list of publications resulting from the project must be uploaded in the language of the application (max. 6 pages).

• Additional documents in the case of resubmission: If the application is a revised version of a previously rejected application (see section 2.4), a response to the reviews and an overview of all changes made in the resubmitted application must be uploaded.

• Cover letter accompanying the application (optional)

• List of max. 3 researchers (optional) – including, if applicable, reviewers of a rejected proposal – who are to be excluded from the review process (see section 3.2), with a brief justification

Any additional documents (e.g., recommendations for potential reviewers, letters of recommendation, forthcoming publications) will not be considered in further stages of the application process.

2.1.5 Forms to be completed

• Required: Research institution assignment form, Contact form, Application form, Cost breakdown form, Academic abstract form, and Co-authors form

• Where applicable: Associated research partner form, Other cooperation form

2.2 Application content and form

2.2.1 Application language

To allow applications to be reviewed by international scientific or scholarly experts, applications must be submitted in English. If desired, a version in German or another specialist language may be added as a supplement. Submission solely in German or another specialist language other than English is only permitted in exceptional cases. Such exceptions apply exclusively to applications from the fields of linguistic and literary studies involving only texts in German or languages other than English. In all such cases, it is absolutely necessary to consult the project officers in the respective FWF specialist department prior to application. An academic abstract for the project as well as a brief yet convincing statement explaining why submission in a language other than English is justified for substantive academic reasons will be required. The final decision shall be made by the relevant decision-making bodies of the FWF.

2.2.2 Project description: Scope and formatting requirements

The project description may not exceed 10 pages. It must contain a table of contents with page numbers. Optional components such as a list of abbreviations or figures, captions, tables, footnotes, etc. are to be included in the 10-page limit.
The continuous text in the project description, Annexes 1–3, the publication lists, and the additional documents specified in section 2.1.4 where applicable, must be written, without exception, in 11 pt. font with 1.5 line (15–20 pt.) spacing and at least 2 cm margins. A standard, easily legible font must be used for the body text. The form requirements (font type and size, line spacing, and margins) of the project description also apply for the additional documents, except for documents not prepared by the applicant, such as collaboration letters.

Citations in the text and the list of works cited (References) in the application must be in line with the conventions of the respective discipline, preferably according to a widely used style guide (e.g., Chicago Manual of Style, APA Publication Manual). The choice of citation conventions or style guide is up to the applicant, but must be implemented consistently throughout the application. If available, a DOI address or another persistent identifier should be used for the literature cited.

2.2.3 Project description and annexes

The project description may not exceed 10 pages and must include a table of contents as well as the following sections, each designated by headings:

1) Table of contents
2) Citizen science aspects
3) Interactions with citizens, planned handling of data
4) Research team
5) Expected far-reaching effects
6) Additional aspects: ethical, sex-specific and gender-related aspects

Specific questions relating to points 2) to 5) apply; these should be addressed in the project description. These questions for reviewers are listed in Appendix B.

Annex 1: List of literature cited in the application (References) on no more than 5 pages

Annex 2: Financial aspects

The template for the description of projected costs can be found in Appendix A.

- Information on the lead research institution and the research institutions of associated research partners
  - Existing project participants (not financed by FWF project funds) (usually the PI and academic project staff at the research institutions)
- Available infrastructure
- Information on the funding requested
• Explanation of why the personnel requested is needed (type(s) of requested position(s), job descriptions, extent of employment, and duration of involvement in the project)

• Concise justifications for non-personnel costs (equipment, materials, travel expenses, and other costs); if funding for equipment is requested, applicants must explain why this does not constitute part of the basic equipment of the given research environment – see section 2.3.2).

Annex 3: CVs and description of previous research achievements

The academic CVs and research achievements (for the principal investigator as well as a maximum of three other key project participants) should be described on no more than three pages per person, as specified below.

Required contents for academic CVs:

- **Personal details:** Personal data (name, researcher unique identifier(s) such as ORCID, research ID, etc., no photos), address of research institution, and relevant websites; please also provide a publicly accessible link to a list of all the researcher’s publications.

- **Education:** List of academic milestones

- **Position(s):** List of academically relevant positions (with the extent of employment in the case of part-time employment)

- **Career breaks (if any):** Indication of interruptions or delays in academic career

- **Net research experience** (optional): The length of time (in years and months) that has actually been used in net total for research – calculated in such a way as to be equivalent to full-time employment – and broken down into the time before and after completion of the applicant’s doctoral degree; this is intended to make it easier for the reviewers to assess the researcher’s qualifications in terms of academic age.

- **Research interests:** Description of the main areas of research and the most important research results achieved to date

- **Academic publications:** List of no more than ten of the most important published or accepted academic publications (journal articles, monographs, edited volumes, contributions to edited volumes, proceedings, etc.); for each publication, either a DOI address or another persistent identifier should be indicated, if available. Pursuant to the Agreement on Reforming Research Assessment, journal-based metrics such as journal impact factors, Article Influence Scores, or the h-index should not be included.

- **Additional research achievements:** List of no more than ten of the most important research achievements apart from academic publications, including achievements such as freely accessible research data including software and codes, awards, contributions to
conferences, keynote lectures, significant research projects, peer review activities, promotion of junior researchers, exhibitions, interactions with society (including citizen science or transdisciplinary activities), science communication, knowledge transfer, licenses, or patents. If available, a persistent identifier or link to the research achievement must be provided.

Annex 4 (optional): Collaboration letters

Collaboration letters (each no more than 1 page) from national and international collaboration partners who are named in the project description as being essential for the implementation of the project and whose role is plausibly described

2.2.4 Publication list

The following file is required:

- *Publications_list.pdf*: A list of all research publications over the last five years\(^6\) (categorized into “quality-assured publications” and “other publications”) by all participants for whom a CV has been submitted, as well as for all project staff members for whom personnel costs are requested, in one PDF file; this publication list helps the FWF to determine if there are any potential conflicts of interest with reviewers. It will not be forwarded to the reviewers.

2.3 What project-specific costs can be funded?

When requesting funding, the regulations of the respective research institution and the FWF guidelines apply. The requested funds must be summarized in the *Cost breakdown* form.

Funding may only be requested for the cost categories specified below.

2.3.1 Personnel costs

Funding may only be requested for staff needed in addition to existing personnel resources for the realization of the project and only to the extent required for the project.

Full- or part-time employment contracts (*Dienstverträge*, DV) and contracts for marginal employment (*geringfügige Beschäftigung*, GB) are available for project staff. The FWF’s *standard personnel costs* apply.

Employment contracts for doctoral students may not exceed 75% employment (up to 30 hours per week). A part-time (50%) employment contract of 20 hours/week for student

---

\(^6\) Publication lists must include: all authors, complete titles, journal, year, and page numbers. For each publication, if available, either a DOI address or another persistent identifier should be indicated; for publications with more than 20 authors, an “et al.” citation can be used.
employees may be requested for researchers who have not yet completed a graduate
degree program in the relevant subject area.

When requesting funding for PROFI (project funding via research institutions) -eligible
standard personnel costs, a fixed percentual increase must be included for the subsequent
year to compensate for wage raises (see Standard personnel costs and salaries for PROFI
projects 2023).

2.3.1.1 Grant-salaried consortium members

The FWF understands “grant-salaried” to mean that the principal investigator’s salary is
financed by the funds of the research project.

Applying for funding (including partial funding) of one’s own position is possible for every
principal investigator, regardless of whether they are in fixed-term or long-term employment
at the time of application. The senior postdoc salary rate applies for the principal
investigator’s own position (pro-rated accordingly in the case of partial funding).

Women principal investigators whose own position is funded to the extent of at least 50%
have the additional option of applying for up to €2,000 per year in the category of “Other
costs” for personal coaching and further training measures that directly contribute to their
career development. Coaching is understood to mean person-centered counselling and
support processes in a professional context. Continuing education activities eligible for
funding include courses on scientific – in particular, subject-specific – skills (e.g., courses on
methodological skills) and personnel development measures such as those offered at some
research institutions (e.g., in teaching, academic writing, writing funding applications,
especially in English, personnel management and project management, conflict- and
problem-solving skills, academic organization, and vocational training and other seminars
directly related to career development, e.g., programs for the advancement of women).

2.3.2 Equipment costs

Funding for equipment may only be requested if it is specifically required for the project and if
it is not part of the existing infrastructure of the participating research institution(s).
“Infrastructure” is defined to include all equipment (and components thereof) that a modern
research institution needs to conduct basic research in the relevant discipline at an
internationally competitive level. This means that equipment such as computers (laptops,
etc.) is considered part of the standard infrastructure and no funding will be approved for
these items.

Equipment eligible for funding includes:

---

7 The senior postdoc rate can only be requested to fund the principal investigator’s own position; the postdoc salary rate applies
for project staff members at the postdoc level.
• Scientific instruments
• System components
• Self-constructed devices (generally assembled from smaller pieces of equipment and materials)
• Other durable goods
• Intangible assets such as concessions, industrial property rights, and licenses derived from such rights

Equipment with an acquisition value in excess of €250,000 can only be financed through depreciation. Only the percentage of costs that are incurred during the project period can be requested and financed. The depreciation rules of the research institution acquiring the equipment apply.

If funding is requested for a piece of equipment which is required specifically for the project, the lead research institution must submit the Affirmation of the lead research institution form to confirm that they have verified that no comparable equipment that could be used or shared is available within a reasonable distance, and that third-party (co-)financing options have been explored. The research institution that owns the equipment must also ensure that any possible costs arising from the use, maintenance, and repairs of the equipment are covered.

The principal investigator is to instruct their research institution to order the equipment and effect payment accordingly. The principles of economy, efficiency, and expediency apply to any acquisition. The procurement guidelines of the research institution and the provisions of the Federal Procurement Act 2018 as amended apply.

In order to determine the equipment costs (incl. VAT, unless the research institution is entitled to deduct input tax) to be requested, vendor quotes must be obtained before the application is submitted pursuant to the research institution’s procurement guidelines. Vendor quotes are submitted to the FWF only upon request.

2.3.3 Material costs

"Materials" is defined as consumables and small items of equipment (cost per item less than €1,500 incl. VAT).

The calculation of funds requested for project-specific material costs should be justified based on the project’s schedule, work plans, and experimental schedule. Experience from previous projects should be considered in making the calculations.

2.3.4 Travel costs

Funding may be requested for project-specific travel and accommodation, field work, expeditions, etc. The project description must include a detailed itinerary, broken down by project staff members. This plan must indicate which staff members will be travelling, the
destination, for what purpose, when (in which year of the project), for how long, and how much the travel will cost.

When planning travel in connection with a project, researchers should always carefully consider whether travel is absolutely necessary or whether the relevant information can be exchanged virtually.

If a project requires travel, transportation by train is preferred to travel by air as a contribution to environmental sustainability. Funding can be requested for any resulting extra costs such as an additional overnight stay. When travelling by air, it is strongly recommended to make a carbon offset contribution\(^8\) which can be requested as part of the travel expenses or funded through the budget for general project costs. A carbon offset contribution can be requested for up to 15% of the ticket price.

Travel expenses for researchers from Austrian and international research institutions other than the lead research institution or associated research institutions can only be granted in exceptional cases. Grounds for the exception must be provided in detail.

Travel and accommodation costs are generally calculated according to the lead or associated research institution’s individual travel expenses policies. If no such policies are in place at the research institution, the federal regulations governing travel costs (Reisegebührenvorschrift des Bundes 1955, RGV) as amended apply.

### 2.3.5 Costs as part of national and international collaborations

Unlike when cooperating with associated research partners (see section 1.6), costs arising in the context of a research collaboration with an external research institution are to be borne by that research institution. This does not apply to cooperation arrangements with scientists or scholars from developing countries (see section 2.3.6).

Funds may only be transferred directly to a cooperation partner (in Austria or abroad) upon presentation of an invoice and only if they are in payment for clearly defined commissions or services and immediately necessary to carry out the Austrian project.

### 2.3.6 Other eligible costs

- Independent contractor agreements (costs for work of clearly defined scope and content carried out by individuals, provided that they are cost-efficient and justified in the context of the research project)

- Costs for the preparation, archiving, open access, and reuse of research data in repositories in accordance with the FWF’s Open-Access Policy

---

\(^8\) The amount of a CO\(_2\) offset contribution for flights can be calculated, for example, using Climate Austria’s [CO\(_2\) calculator](https://www.climate-austria.at/en/services/offset-calculator).
• Costs that cannot be included under personnel, equipment, materials, or travel costs, for example:
  • The use of research facilities, e.g., costs for the project-specific use of available equipment (project-specific “equipment usage time”) or large research facilities
  • Any laboratory animals necessary for the project
  • Project-specific work carried out outside the researcher’s research institution (e.g., for analyses carried out elsewhere, interviews, sample collection, etc.)
  • Disposal of project-specific hazardous waste
  • Cooperation arrangements with researchers in developing countries

The procurement guidelines of the research institution and the provisions of the Federal Procurement Act 2018 as amended apply.

2.3.7 General project costs

The approved grant sum includes 5% general project costs that are permitted for funding but cannot be requested individually using the abovementioned cost categories. They are subject to the FWF’s Funding Guidelines and the costs must be eligible for funding. These include, for example, costs for conference travel, dissemination activities, and minor unforeseen costs necessary for the project.

Overhead costs for the research institution are not included in general project costs.

General project costs are to be entered in the appropriate field in the Cost breakdown form and calculated as 5% of the total funding requested (see section 3.3). No justification for general costs is needed in Appendix A.

2.3.8 Publication costs

Publication costs cannot be requested as part of the application process. Information on funding options for publications resulting from FWF-funded projects can be found on the FWF website: Open-Access Block Grant.

2.4 Resubmitting a previously rejected application

A resubmission is defined as the revision of an application addressing the same or similar research questions as a proposal the FWF has previously rejected, regardless of the program category. If an application is submitted on the same or a very similar research question and if, in the view of the applicant, this application is not a resubmission but a completely new project, this must be explained in a separate accompanying letter to the FWF Office. For example, changes in research methods alone are not sufficient for a proposal to qualify as a completely new project. In cases of doubt, the appropriate decision-making bodies of the FWF shall decide.
Resubmissions must show changes from the rejected application. If an application has been rejected for reason C3, C4, or C5, these changes need to be substantial (based on the comments in the reviews). If no such changes are made, the FWF’s decision-making bodies will return the application to the applicant without review.

When resubmitting an application, the following documents must be uploaded:

- An accompanying letter containing an overview of all changes made in the resubmitted application must be submitted to the FWF. This overview will not be passed on to the reviewers.

- A response to all reviews of the rejected application must be provided, even if one of the reviewers is to be excluded from reviewing the resubmitted application (see section 3.2). This response, consolidated in one document, will be forwarded to all reviewers assessing the resubmission and should address the recommendations and criticisms included in the previous reviews as well as describe the resulting changes made.

While no deadlines for the resubmission of a rejected application apply, the respective application requirements do need to be complied with. Resubmissions must be submitted as described in section 2.1, i.e. as a separate, new application and not as a supplementary application to the previously rejected proposal.

2.5 File formats, file names, and online forms

The following sections provide an overview of all files and forms to be submitted.

2.5.1 All applications must include the following parts:

a) Files
   - Proposal.pdf (project description incl. Annexes 1–3 and where applicable 4, with PDF bookmarks, at least for the major sections)
   - Summary_main.pdf
   - Publications_list.pdf (publication list of all the key project participants for the last five years, categorized into “quality assured publications” and “other publications”)

b) Forms
   - Research institution assignment
   - Contact

   - Academic abstract (in English)
   - Co-authors
   - Associated research partners (if applicable)
   - Other collaboration (if applicable; for national and international collaboration partners)
2.5.2 File uploads, if applicable

- **Cover_letter.pdf** (= accompanying letter; optional)
- **Letter_of_support.pdf** (= PI’s declaration of support; optional)
- **Negative_list.pdf** (= reviewers who should be excluded; optional)
- **Follow.pdf** (= result report or final project report of the previous project for follow-up applications; will be forwarded to the reviewers)
- **Overview_revision.pdf** (= for resubmissions, overview of all changes made in the resubmitted application)
- **Revision.pdf** (= for resubmissions, response to all reviews of the previously rejected application)

3 Processing and Decision on the Application

3.1 Submission and requests for changes

All of the files and forms specified above must be uploaded in full to elane. Once an application has been officially submitted, the research institution and the applicant can make no further changes to the application themselves. All applications are checked for completeness and any formal errors by the FWF Office. If the FWF Office identifies issues with the application that it considers to be rectifiable, it will notify the research institution and the applicant, giving them the opportunity to correct the problems within a reasonable period of time (generally 10 working days). The requested changes are to be submitted to elane as a supplementary application and approved for submission by the lead research institution if necessary. If the requested changes are not submitted before the deadline, the decision-making bodies at the FWF will return the application without review.

Similarly, applications will not be reviewed if they have been previously rejected by the FWF and resubmitted without appropriate revisions (see section 2.4).

The most common reason why applications are returned without review by the FWF’s decision-making bodies is a lack of or insufficiently integrated citizen science approach (see section 2.2.3).

Once the review process has begun, no more changes can be made to the application.

3.2 Excluding reviewers

A list of a maximum of 3 potential reviewers who should not be consulted to review the proposal due to a possible conflict of interest can be uploaded as an additional document. The applicant must briefly explain why these reviewers should be excluded. If the reasons for exclusion are professionally and academically sound, the FWF will generally fulfil such
requests and will exclude these reviewers from the review process. A detailed description of the FWF’s policy on conflicts of interest can be found in the General Principles of the Decision-Making Procedure.

Please note that the FWF does not wish to receive, nor will it consider a list of potential reviewers from applicants.

3.3 Number of reviews required

The number of reviews required for funding approval does not depend on the amount of funding requested. Up to the maximum application amount of €100,000, two reviews are required.

3.4 Decision-making process

For detailed information on the decision-making process, the criteria for selecting international reviewers, detailed rules concerning conflicts of interest, and the composition of juries and review panels, please see the General Principles of the Decision-Making Procedure.

The review process generally takes about 6 months. More detailed information is available online on the FWF Dashboard.

The review process is carried out in writing, i.e. two written reviews are obtained from international experts. When the review process it is completed, the FWF Board considers the reviews and decides whether the proposal should be funded. The lead research institution and the applicant are informed in writing of the FWF’s decision.

3.5 Grounds for rejection

The reasons for rejecting an application are assigned to one of five categories (C1–C5) and communicated to the applicant and the lead research institution; the applicant is also sent anonymized copies of the reviews. A detailed description of the grounds for rejection can be found in the General Principles of the Decision-Making Procedure.

3.6 Reviewing resubmissions

If the application is a resubmission of a previously rejected proposal, the FWF will generally contact those reviewers who provided constructive criticism on the previous application. Reviewers who gave entirely positive or negative comments will generally not be contacted for a repeat review. Resubmissions are, however, usually also evaluated by new reviewers.
3.7 Proposal bans

Applications that are rejected for reason C5 will be barred for 12 months (from the date of the decision) and cannot be resubmitted during that period.

Applications that have been submitted three times and rejected for reasons C3 or C4 (with the “three times” referring to the original application and two resubmissions) are also barred for 12 months (from the date of decision). Rejections for reasons C1 or C2 do not count towards this total. In general, only topics are banned, not applicants or applying research institutions.

4 Compliance with Legal Requirements and Standards of Research Integrity

4.1 Legal regulations

Please note that research institution(s) must comply with all legal requirements and safety provisions (e.g., Federal Disabilities Act, Federal Equal Treatment Act) that apply for the project and obtain all the necessary permits (e.g., from the Ethics Committee, the Animal Testing Commission, the National Heritage Agency, or the relevant foreign authorities).

4.2 Academic integrity

The Guidelines for Good Scientific Practice of the Austrian Agency for Research Integrity (OeAWI) apply.

Where a breach of these standards is suspected, the ombud of the respective research institution is responsible for investigating the issue. The research institution must report any cases of suspected serious deviations to the OeAWI. The FWF reserves the right to suspend, in part or in whole, any procedures related to applications or ongoing projects until this check or investigation has been concluded. For more detailed information, please see FWF procedure in cases of suspected violation of the standards of good research practice.

5 Data Protection and Publication of Project Data and Results

5.1 Data protection

Regarding personal data, pursuant to Art. 6 (1) item a of the General Data Protection Regulation (GDPR), the applicant or applying research institution consents to the processing of personal data and other data (e.g., title of the project submitted, research institution,
academic abstract, PR summaries) necessary for the administration of the funding by the FWF – while safeguarding business and trade secrets – for the purposes of research policy (e.g., presentation of the development of basic research in Austria, economic analyses, funding impact reports, etc.), and for public relations work (publication of excerpts in the FWF annual report, on the FWF website, in press releases, media collaborations, etc.) and to the passing on of this data to third parties (e.g., for use in research policy studies). This consent can be revoked at any time in full or in part in writing to the FWF with effect for future data processing. Further information on the data privacy rights of the applicant or applying research institution as well as the contact details of the FWF’s data protection officers is available here.

5.2 Publication of project data and results

Please note that if a grant is awarded, a PR summary in German and English will be published on the FWF website, as well as the grant amount and later, PR summaries of the project’s findings in German and English. Summaries must be submitted to the FWF when the grant agreement is returned. The principal investigator must ensure that these texts are worded in such a way that legitimate interests of secrecy for reasons of national defense and patent law are safeguarded and business secrets are protected appropriately. Guidelines for writing PR summaries can be found here.

In addition, the FWF requires a data management plan (DMP) for all approved projects. This plan should also be sent to the FWF when returning the grant agreement. The template for the DMP can be viewed and downloaded here.

The guidelines specified in the grant agreement on acknowledging the FWF as the funding institution and the FWF’s Open-Access Policy apply for any publication of project results (e.g., academic publications, research data, conference papers, and media reports).
6 Appendices to the Application Guidelines

6.1 Appendix A: Information on the research institution and description of financial aspects

Information on the lead research institution and any associated research institutions and the description of project finances must be presented in English using the following structure and appended to the project description as Annex 2. Costs must be broken down and adequately justified for each point below. The list of and justification for the requested funds must correspond to the costs indicated in the Cost breakdown form.

(a) Details on the applicant's research institution and - if applicable - of associated research partners:
- Existing personnel (not financed by the FWF, usually the principal investigator and research personnel at the research institution(s))
- Existing infrastructure

(b) Information on the funding requested:
- Explain briefly why the personnel requested is needed for the project (number and type of requested positions, job descriptions, extent of employment, and duration of involvement in the project)
- Explain briefly why the non-personnel costs requested are justified (equipment, materials, travel, and other costs). If funding for equipment is requested, applicants must explain why this does not constitute part of the basic equipment of the given research environment - see also section 2.3.2.

Please list and provide justifications for the following:

Personnel costs
Equipment costs
Material costs
Travel costs
Other costs (including independent contractor agreements)
6.2 Appendix B: Notes and questions for reviewers of Top Citizen Science projects

In all of its programs, the FWF actively supports equal opportunities and equal treatment. The review of a proposal must not put researchers at a disadvantage for non-research-related reasons such as age, gender, etc. For example, the review of applications should not focus on the researcher’s actual age, but on the relation between the researcher’s previous research achievements and the length of his/her research career.

Our commitment to equal opportunities also means considering breaks or delays in applicants’ research careers (e.g., due to parental leave; long-term or chronic illness; disability; caregiving responsibilities; etc.), which may have resulted in gaps in a researcher’s publication record, unorthodox career paths, or limited international research experience. Please also see our information for reviewers on unconscious bias in the decision-making process.

Only the ten most important academic publications and the ten most important additional research achievements of the applicant are to be considered when evaluating the application. As a signatory to the Agreement on Reforming Research Assessment, the FWF also emphasizes that, in assessing research performance, reviewers should refrain from using journal-based metrics such as journal impact factors, Article Influence Scores, or the h-index.

Please review the current proposal based on the following six assessment criteria: 1) Citizen science aspects, 2) interactions with citizens and handling of data, 3) researchers’ qualifications, 4) expected wider impacts, 5) ethical and gender-related aspects, and 6) final assessment. For each of these criteria except 5) we ask you for both written comments and a rating on a scale from “outstanding” to “poor.” Please be aware, however, that the FWF’s funding decision will be based primarily on reviewers’ written assessments rather than the ratings assigned.

Please keep in mind that sections 1 and 2 will be forwarded to the applicant in full and in anonymous form. In the event of approval, the research institution will be allowed to read the anonymized reviews forwarded to the applicant.

---

9 Further information is available on our website: FWF’s corporate policy and mission statement and the Application Guidelines for a TCS expansion project

10 The project proposal must meet the FWF’s formal requirements. Please bear these in mind when writing your review. (Key formal requirements: 10 pages max. for the project description including figures and tables; 5 pages max. for the list of references; 3 pages max. for each academic CV, including a description of previous research achievements and the ten most important publications. For further details, please see the Application Guidelines for Top Citizen Science)
Section 1:
1) Quality aspects - Top Citizen Science project
   a) How would you assess the proposal’s relevance in relation to the current international state of research and to citizen science activities?
   b) Are the objectives of the TCS extension project and the rationale for choosing the citizen science approach clearly presented?
   c) To what extent does the proposal represent a meaningful extension/addition to the existing basis project?
   d) What additional substantial research findings that would not be possible without citizen participation will be generated by the extension project?
   e) Are the methods, work plans, and schedules clearly defined and appropriate?
2) Quality aspects - interactions with citizens and handling of data
   a) Is the target group and the size of the target group clearly defined and sufficient?
   b) How do you rate the communication concept for the planned target group and the planned methods of involvement?
   c) How do you rate the added value and personal benefits that citizens can derive from this project?
   d) Is the quality of the data adequately ensured?
   e) How would you rate the applicant's planned handling of data protection aspects?
3) Quality aspects - Research team
   a) How do you assess the composition and qualifications of the research team, particularly with regard to experience and plans in connection with Citizen Science?
   b) How would you rate the quality of existing and planned collaborations?
4) Expected far-reaching effects
   a) How do you rate the dissemination strategies described?
   b) What potential effects could the planned TCS expansion project have on other research fields and/or social areas (social impact, positive effects on the public perception of science, etc.)?
5) Additional aspects:
   a) Ethics: Have ethical considerations been addressed satisfactorily?
   b) Sex-specific and gender-related aspects: Applicants are required to address any relevant sex-specific and/or gender-related elements inherent in research questions and/or research design. Please assess whether the treatment of these components is adequate.
6) Overall evaluation
   What is your overall impression of the proposal? Specifically, what would you consider its key strengths and weaknesses? Please give reasons for your answers, taking as much space as you need.
Section 2: Optional recommendations for the applicant

If you are in favor of the project being funded, you may want to add to the formal assessment in Section 1 by making further and perhaps more informal comments or suggestions here. However, please note that these remarks, too, may also have an impact on the FWF’s funding decision, especially if they amount to substantive criticism of the project.

Section 3: Confidential remarks to the FWF

Please use this space to make any comments that you do not want submitted to the applicant. Feel free to also give us feedback about the evaluation process and your interactions with us.
